

Gregg Haider
Sales Manager – Preparation
Crown Iron Works Co.
Minneapolis, MN USA

After receiving his Bachelor of Science degree in Industrial Technology from St. Cloud State University, Gregg started working at Crown Iron Works in 1992. His first years at Crown Iron were dedicated to the Research and Development area assisting on many new areas of design including Model 4 Extractors, Model 5 Extractors, and Soybean Dehulling Systems. From 1995 until 2000 Gregg worked as a Project Manager for preparation systems and in 2001 moved into the position he has today as the Sales Manager for Preparation systems worldwide.

Gregg has helped with the development of all the preparation systems Crown Iron offers with the first years dedicated to Crown Iron's soybean dehulling systems. Today there are over 90 Crown soybean dehulling plants operating around the world. In recent years Gregg has assisted on the development of the most recent processes Crown offers including Dry-milled Corn Fractionation, Canola Conditioning and preparation, Jatropha preparation, and Sunflower dehulling.

Crown Iron Works provides engineering and equipment for the preparation, extraction and refining of oilseeds, and oleochemical processes such as methyl ester transesterification (biodiesel) and glycerin refining.
