Healthcare 2020: Emerging Business Models

Event

12.04.2019

Cost: Free

Hosted By: Fredrikson and Deloitte

On December 4, 2019, Fredrikson hosted “Healthcare 2020: Emerging Business Models” with Deloitte to discuss how data is driving value-based care models and partnerships and how regulatory initiatives around price transparency, interoperability, and referral relationships are shaping (or chasing) the future.

Asif Dhar of Deloitte provided an eye-opening presentation of the current state of smart health communities and how to effectively analyze health data so that individuals and communities can better manage population health and focus on preventive health measures.

Our healthcare provider and policy panelists engaged in an interactive session focused on new business initiatives, how data is used to drive care delivery, the impact of interoperability and price transparency in the U.S. health systems, and the rise of robotics and AI in healthcare delivery.

Thank you to our attendees, and a special thank you to all of our panelists for their time and insights into how healthcare is impacting their business and what the future holds for a healthier society.

Guest Panelists

- Kushan Biswas, Senior Manager, Deloitte Consulting
- Asif Dhar, Principal and Chief Health Informatics Officer, Deloitte Consulting
